TablesWin produces fully customizable gaming tables and casino equipment. TablesWin represents the connection between technology, design and art. A company born as derived by the “Meneghetti Mobili” furniture brand, an established artisan joinery from Bassano already present in the market for 30 years. From the union between experience and the freshness of new technology emerges TablesWin, a company that can create the “**sartorial**” **product**, stitched to perfection on the desire of the customer. An enchanting result, thanks to the use of the best raw materials and to a maniacal pursuit of perfection in the details.

**TablesWin reinvents the craftsmanship**, building to the manufacturing tradition and also through the use of the most modern technologies, thanks to the main company's engine: the passion and devotion to a complex craft. Charming and immortal TablesWin is able to design and develop products that go beyond the simple object, becoming true masterpieces.

RFID TEKWIN

To face up enquiries of professional tables with high technology, we developed TablesWin Rfid project. Software designed to reduce operator activity during a Texas Hold'em poker match: from automatic card reading to stack management. Any aspect was considered to limit operator work to enter play action carried out during round of the game. TablesWin Rfid was not realized to this aim: not only match control but suitable tool to realize direction and post-production of an event thanks to its powerful multimedia technology. Mix video Live and graphic overlay of the match included. Over to information regarding the table, players, cards on the table, winning ratios, players activities, the "TORNEO" form allows to obtain summary boards on request from a wide statistical data range. From chip-counting of the table to statistics of each individual player, this form was also conceived to display information for the whole competition (general data, rankings, prize money, blinds etc.). Main and advanced feature of this project is absolute freedom to obtain customization of any graph aspects over elements input and output animation.

Any TablesWin RFid project is EXCLUSIVE in logos, colors and graphics.  
Top model of the whole project is form "LIVE" enabling integration with an

HD video signal input throughout the post-production of a television event.

Video output function can be delayed allowing direct postponing or file recording for later online loading or dedicated software editing.  
All program signals are in FULL-HD for maximum quality available today on the market.

For directing console and professional post-production, the software is able to provide customizable a video signal to HDMI / SDI CHROMA-KEY.

Monitor Rfid TRAY allows real time control of proper operation of antennas on the table. Activities of receivers are listed real time in a simple and clear way enabling the operator to control or act on each receiver. All operations such as testing, shutdown or reset of each antenna can be performed (during a match) in a very practical and easy way.

MONITOR DIRECTOR

Operator window displays all essential information on the progress of the match. The graphics, fully customizable, automatically adapts to used screen and enables interaction with controls via mouse, touch-screen and direct keyboard commands. Compatible with tablet pc systems.

# PLAYER SETUP

Player 01 tableswin®

Name

Surname

Nickname

Nation  Age 44

Stack  RFid

Enabled

Essential and practice interface encodes in a few moments all players at the table. Each player may be added to or retrieved from archive that stores the program with each new post. In the base module are provided essential information for the main graphics.

MONITOR DIRECTOR

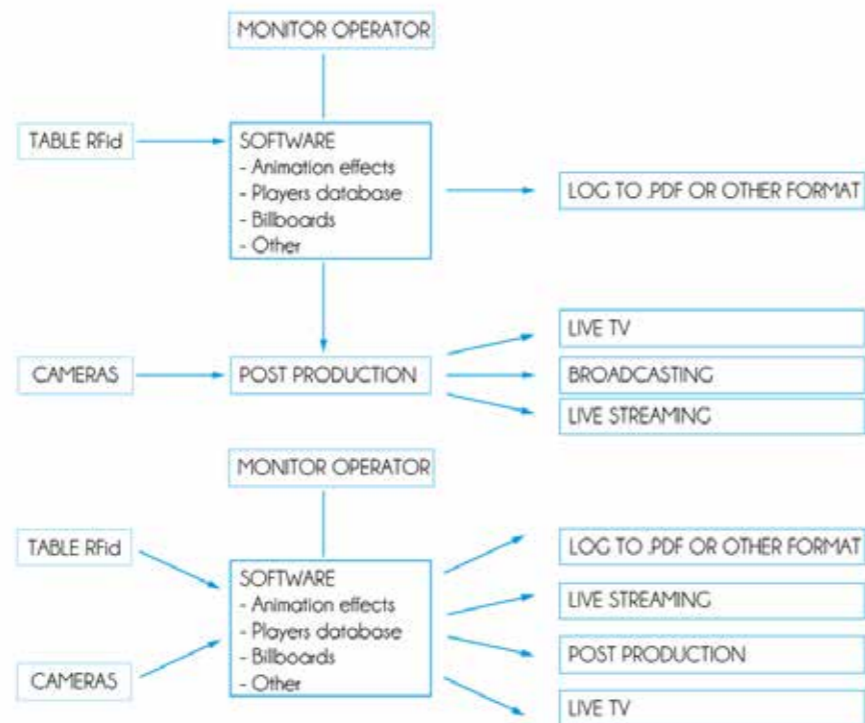

All match phases in real time, allowing the operator to set player actions or to change any information concerning the match (dealer, stack, etc.). All transactions are recorded in a diary allowing the operator to undo or redo multiple actions.

MONITOR LIVE

The highlight of Tableswin Rfid project is the capability of real-time processing of video and visual effects applicable to graphics. The system is in degrees to acquire, process and play a stream video in FULL-HD choosing between three different output systems including GRAPHICS w / ALPHA CHANNEL, CHROMA-KEY or LIVE COMPOSING. All graphics of the application, cards, player names, pot, hand counter etc., have been designed to be completely customizable and entry, exit and persistence animations elements are tailored to specific customer requirements.

Every item in the screen LIVE is vivify with possibility to alternate information on progress of the match with specific information to each player in addition to billboards statements. Among advanced tasks of direction console, messages scrolling, player monographs activation, commercial video with single player introduction are available and many more. Basic modularity of the project Tableswin RFid allows configuration of any solution in accordance to different needs of final customers, from private poker room to post-production tv studios.

## MAIN FEATURES

## TECHNOLOGY RFID

- Professional table equipped with high quality RFID antennas.
- Ensuring accurate reading of cards with reaction time less than 2 seconds.
- One USB cable to carry all information to the console (basic extension up to 30 meters).
- Coding of provided information to achieve maximum safety.
- Any orientation cards reading.
- No perceived difference on the cloth (antennas are installed below thickness of the table and are capable of reading up to a height of 1cm).
- Maximum reliability thanks to PC STATION PROFESSIONAL RFID for management and DIRECTED VIDEO supplied with the SYSTEM.

# GRAPHICS AND VIDEO

- Quality of output video signal with FULL-HD 1080p (1920x1080px).
- Animation effects at 60 frames per second, maximum fluidity.
- Preview video on screen operator.
- Video output HDMI / HD-SDI in FULL-HD 1080p (1920x1080p).
- Video output Alpha Key or Chroma Key (customizable) for console professional directed.
- Graphics of the table and playing cards tailored for each client.
- Element positioning and animation of the game completely customizable (\* gold version).
- Possibility to apply a customized LOGO on the video signal.
- Support for multi-screen (monitor OPERATOR, monitor I / O LIVE)

# OPERATOR

- Adaptable interface to any monitor / resolution
- Automatic reading of the cards in the game thanks to RFID
- Chip counts, player stats (VPIP%, PFR%) and payout percentages automatically calculated.
- Action controls : Fold, Call, Bet, Raise, All-in with possibility of undo / redo all entered commands.
- Review controls : assigning Dealer, aiming correction, correction cards in play, match cancellation, revision stack player / competition data.
- Accessible controls by mouse, keyboard or monitor / Touch Screen devices.
- Autosave with possibility of pause / resume the match.
- Save / Load player data, data competition, match data.

ADDITIONAL FORM

# FORM LIVE

- Signal acquiring quality video FULLHD 1080p (1920x1080px).
- Possibility of acquiring any video source (HDMI, HD-SDI, DVI, COMPOSITE, COMPONENT etc.).
- Real time coupling of LIVE video and game graphics.
- Control window and operator preview.
- Video output HDMI / HD-SDI in FULL-HD 1080p (1920x1080px).

# STREAMING FORM

- Save a H264 video files for publishing / online sharing. - Support for online LIVE VIDEO BROADCASTING.
- Support for streaming video or LIVE DELAY.
- Streaming user-configurable delay (up to 15min.).
- Setting up data rates and level of audio video compression.

# NOTICE-BOARD FORM

- Set notice boards summary.
- Boards automatic management of player statistics, Chip Count Table, etc.
- Direction functions to show / hide a board.
- Input and output animation of score boxes fully customizable.
- Facility for issuing text message scrolling.

# SECURITY SYSTEM

In order to ensure the complete security access to the personal database of the owner, a hardware key is released together with the computer to enable the use of the software on the specific computer and only on it. Without the certificated key the program doesn't work and any access is denied.

That's why we give you the full equipment:

- Hardware +software + computer + security key.

The data are never filed in any server of Tek-Win; they remain to the exclusive property of the customer, for a complete privacy warranty.

The remote assistance is supplied by using a special technology given to the customer together with the regular licence of property.

This service of maintenance enables the connection with the direction only once the customer has confirmed and accepted the request of connection from the remote operator.

This service is available also for other mobile devices, such as smartphone or tablet.
