DEVICES & PRODUCTS

HYGIENE SOLUTION

PLEXI SOLUTION

NOW AVAILABLE!

tableswin

The power of nature at the service of your Casino's hygiene. Sanitize CASH, CHIPS, CARDS, NON VALUE CHIP COVER for the safety of players, without using chemical agents.

The ozone sanitizer line is an innovative system to guarantee the microbiological security of **cash, cards, chips, non value chip cover** and **shufflers** . Thanks to its exclusive ozone functioning system it attacks the various organic compounds oxidizing and inactivating them (mites, bacteria, fungi, molds, **Covid-19**).

It has been studied, designed, patented and made in Italy in full compliance with current Ozone Regulations and construction directives and with the CE mark.

ACTION TIME

For a normal virus, the machine takes 10 minutes to clean.

In the case of Covid-19 it has been tested that it takes from 10 to 30 minutes to obtain a complete sanitation.

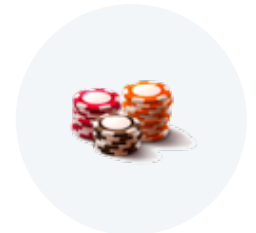

ECOLOGICAL

- The system guarantees the conversion of excess residual ozone into oxygen inside the device;
- Elimination / reduction of the use of chemicals for the sanitization of money and chips (Biotechnology with "zero" environmental impact);
- Dry and rapid sanitization;
- Fragrance of tokens and accessories with natural essences

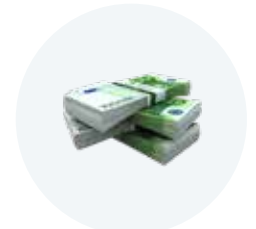

AVAILABLE MODELS

tableswin
